## WORK EXPERIENCE

### Expense Tracker App

Developed an Expense Tracker App with features like income and expense tracking, budget setting, visual charts, and interactive alerts.

### E commerce App

Created a Multi-Page E-commerce Website that fetches products from an API, handles add-to-cart logic, and manages the checkout process.

### Dynamic App

Built a dynamic App using React.js, integrating third-party libraries and Tailwind CSS. Implemented React Router for seamless navigation and used Axios for efficient API handling. The app features CRUD operations, allowing users to interact with data fetched from an external API.
